Hi Gary,
Do you have any more information yet (number of drums, etc.)?
Thanks,
Terry

Terry:

We have sent this Frac Tank off-site for cleaning and deodorizing. We anticipate that we will have 1-3 drums of sludge drummed by the cleaning facility and sent back to the site. We would like to see if you guys could possibly dispose of this waste since it should be the same profile for the waste sent to Veolia in the last 2 vac boxes that you guys disposed since it came out of FT1004. I anticipate that we will get the drums back on site sometime during the week of 5/25. Please call to discuss next week and inform Amandeep.

Thanks

Gary Moore
